

Speech-enabled clinical documentation for **MEDITECH EHR.**

Seamless integration, collaborative roadmap and single voice profile deliver an enhanced documentation experience.

Today, more than 2,400 institutions worldwide use MEDITECH's clinically integrated EHR. Nuance® and MEDITECH have partnered for more than 15 years to enhance the physician experience when combining Nuance's Dragon® Medical solutions and MEDITECH. Now, healthcare organizations can easily deploy clinical speech recognition—while saving IT resources, boosting clinician productivity, and supporting better reimbursement through higher quality clinical documentation.

With Nuance, clinicians can use their voice to securely and efficiently document patient data in all versions of MEDITECH.

Whether you want to capture physician narratives locally or leverage the power of the cloud, there's a Dragon Medical that fits your organization's needs, workflows, IT infrastructure requirements, and business goals. And with a single voice profile, clinicians can get up and running faster across clinical workflows, care settings, devices, and apps with a seamless, consistent, and personalized experience across back-end, front-end, on-premise and cloud-based speech solutions. All Dragon Medical solutions deliver the following capabilities and benefits:

- Secure and healthcare-compliant clinical speech recognition for documenting patient notes in the EHR.
- High accuracy out of the gate with no voice profile training, enhanced with ongoing improvements through continuous learning and profile adaptation.
- Integrated cross-platform productivity tools such as auto-texts, commands, and personalized vocabularies.
- Voice navigation and text editing within MEDITECH's documentation tool (via MEDITECH's Meditor).
- Single voice profile and personal customization compatibility across mobile, web and desktop apps powered by Dragon Medical.

Choose the solutions that best fit your needs

Dragon Medical embedded in MEDITECH Expense

Exclusive, speech-enabled workflow allows users to dictate, navigate, edit, and finalize documentation—all with no additional software to install or passwords to remember. Optimized for MEDITECH Expense.

Dragon Medical One

Cloud platform lets users dictate in MEDITECH and beyond, including mobile productivity apps like secure messaging and clinical reference.

Dragon Medical Network Edition

On-premise clinical speech recognition with built-in clinical documentation productivity tools.
