

# DAX™ Copilot

## Frequently Asked Questions for Patients

### What is DAX Copilot?

DAX Copilot is an AI-powered, voice-enabled solution that helps physicians by automatically documenting patient encounters accurately and efficiently. This allows physicians to focus more on patient care and less on administrative tasks.

### How does DAX Copilot work?

DAX Copilot uses a mobile app to record patient encounters. The recordings are then processed into clinical documentation using AI. Physicians can edit the AI-generated notes and transfer them to the Electronic Health Record (EHR) system.

### Is my information safe with DAX Copilot?

Yes, your information is securely handled. DAX Copilot follows strict data privacy and security protocols to ensure that your personal health information is protected.

### Do I need to give consent for my physician to use DAX Copilot?

Consent requirements may differ depending on the state and organization. Consult your healthcare provider for specific information about patient consent when using DAX Copilot.

### Can I access the notes created by DAX Copilot?

The notes created by DAX Copilot are part of your medical record. You can request access to your medical records through your healthcare provider.

### What if there is an error in the documentation?

Physicians review and edit the AI-generated notes before they are added to your medical record. If you notice any errors, you can discuss them with your physician to ensure they are corrected.

### Who can I contact if I have more questions about DAX Copilot?

If you have any further questions, you can ask your physician or contact the healthcare provider's support team for more information.

**MEDICAL DEVICE DISCLAIMER.** Microsoft products are not designed, intended or made available as a medical device(s) and are not designed or intended to be a substitute for professional medical advice, diagnosis, treatment, or judgment and should not be used to replace or as a substitute for professional medical advice, diagnosis, treatment, or judgment.

### BENEFITS

- **Improved physician-patient interaction:** With less time spent on documentation, physicians can spend more time interacting with patients.
- **Accurate records:** The AI ensures that all important details of the patient encounter are accurately documented.
- **Efficiency:** Faster documentation means quicker updates to your medical records, which can improve the overall efficiency of your care.
